T48 Pediatric surgical dentistry. Outpatient treatment [Text]: Learning guide for international master's students, who are trained in specialty 221 "Stomatology" in higher education institutions of the Ministry of Health of Ukraine / P.I. Tachenko, S.O. Bilokon, N.M. Lokhmatova, O.B. Dolenko; «Magnolia 2006». – Lviv, 2023. – 146 pages.

The training manual contains literature data and the results of our observations and methods of healing pathological processes that pediatric surgeons often deal with during outpatient treatment.

Taking into account that statistical data, etiopathogenetic aspects and scientific research concerning nosological forms are covered well enough in corresponding textbooks and periodicals. Their authors have aimed to focus only on issues of practical orientation.

The training manual is intended for students of IV and V years of study at stomatological faculties of higher medical educational institutions, subordinators, medical interns and dental surgeons.

The learning guide was prepared in accordance with the curriculum in pediatric surgical dentistry.
