PREFACE

Experience of teaching medical psychology in medical university reveals a great importance and actuality of basis of general psychology as part of common education of future medical specialists for all specialties. Without knowledge of basis of this science is impossible to teach future physician for understanding psychology of patients with different diseases.

The role of patient's psychic in the successful performing of diagnostic, treatment and rehabilitation is very important. The main objective of medical psychology teaching is learning a future physician of use patient's psychologies peculiarities for the successful health's rehabilitation and protection.

There is critical important to educate medical students on the ethics, morality and humans principles. So a special attention in the textbook was devoted to medical deontology, problems of relations between physician, patient and relatives during different periods of medical care (diagnostic process, hospitalization, investigations, surgical manipulations, unsuccessful outcomes ect.).

Authors of the textbook are hope for the use information from the textbook not only for education process in medical universities, but for professional practice of physicians too.
